(1) Used SW9 Locomotive / Switcher

We have (1) Used SW9 Locomotive / Switcher with remote. This unit is in need of generator work. The generator was done in 2009 so it is not that old. It is said the armature tested good but the field is grounded and may be an easy fix. It is our intention to repair the generator and sell the locomotive for full retail price, however for a quick sale we will sell it as is for less. This is a good strong unit outside of the generator.

- BC Engine
- Braking system is a 6BL system
- Remote control
- Snow plows front and rear

This unit is available today and is located Pennsylvania.
